Step 1

Place foot end caps onto the bottom of the legs 'D'. Note upright position. Place bracket 'A' onto the legs 'D'. A rubber mallet can be used to lightly tap all brackets into the keyholes on the legs.

Step 2

Use shelf bracket 'B' for the side brackets using the bracket 'A' from Step 1 as a guide for height. Use same shelving brackets for opposing sides as shown in the diagram. Place brace 'C' as shown.

Step 3

Join the upper legs to the lower legs 'D' with the connector pins. **Note:** The legs are designed to sit directly on top of each other - do not overlap them. **Handy Hint:** Flathead screwdriver may be used to tap in connector pins.

Step 4

Place MDF board on bottom shelf to minimise buckling. Fix brackets 'B' so that top rivet sits on the upper legs and the bottom rivets sit on the lower legs. Repeat with brackets 'A', followed by braces 'C' as shown.

Step 5

Fix brackets 'B' and 'A' to the top of legs 'D'. **Note:** MDF shelf should sit flush with the top of legs 'D'.
